of them a short time, in the worst scason of the year, I am
able to labor hard svery day. To say the least, I think
I have received more benefit from the Bitters than all othor medicione I have taken. I have not only used your
Bitters myzelf, but have given bottles and parts of bottles
to those complaining of Dyrepesia and Livae Campbing,
and in every oase they tell me thay have taken no medicine so beneficial as the Bitters.

TOP DRESSING WHEAT AT THE TIME OF SOM ING. An intelligent farmer in Mendnon, N. Y, informs us that last fall he top dressed part of a field of wheat with fine manure, and harrowed it in immediately after the need was sown. In the part so dressed the wheat was a weak earlier, and produced double the crop as that on the land unmanured. It is true the land that was top dressed was higher and drier than the unmanured portion. In the latter, the wheat witer-killed hidly; the crop in consequence was thin and late, and the nings destroyed nearly the whole of it. Soll, is it satisfied that a top dressing of good time manura gives the young plants a good clart in the fall, eartiles them to withstand the winter lietter, and brings the crop rapidly forward to maturity, and thus not only increases the growth but lessons the dangers of injury from the midge.
